

For the last 26 years, Dallas school children have been helping Dallas Water Utilities promote water conservation in their community. Congratulations to the 2010 winners!

City of Dallas Water Conservation also wants to thank the Museum of Nature and Science for displaying the winning and runner up artwork at their exciting and interactive exhibit *Water*.

Semana Nacional del Agua Potable

The Effects of Water Conservation

Have you ever been puzzled by the fact that many people around the world struggle to obtain water while the Earth is covered with 70% of it? Well the truth is, this percentage is salt water—not meant for human intake—and only 1% of the entire Earth is made up of consumable water. With our population levels rapidly booming and our water sources gradually declining, water conservation is certainly a thing of consideration.

Por los últimos 26 años, los niños escolares de Dallas han ayudado al Servicio de Agua y Saneamiento de la Ciudad de Dallas promover la conservación del agua en su comunidad. ¡Felicidades a los ganadores del 2010!

También, la División para la Conservación del Agua de la Ciudad de Dallas quiere dar las gracias al Museo de la Naturaleza y Ciencia para mostrar las ilustraciones de los ganadores y subganadores de los concursos en su exhibición emocionante e interactiva de “*Water*” (“*Agua*”).
