1500 Marilla Street, Room 2AN
Dallas, TX 75201
ATTN: Education Coordinator

HOW: See Entry Rules on page 2 for additional information.

2023 Poster Contest Entry Rules

Theme: “The Power of Every Drop”

THE ENTRY FORM MUST BE SUBMITTED WITH EACH ENTRY!

This friendly competition is open to any student enrolled in the **1st - 5th grades** living in the City of Dallas. Your entry into the contest constitutes your agreement to allow your artwork, your name, school name, and grade to be published as a winner, or used on Web sites or in printed and promotional materials owned and/or produced by the City of Dallas and its departments. The artwork will be used for promotion of the 2023 Water Conservation Art Contests and future art contests. Please ensure it is family-friendly content.

Entries must be postmarked or received no later than 5:00 p.m. on Friday, March 24, 2023. Entries must be separated and labeled by grade and teacher/team leader. Artwork must be flat – do not roll or fold. Entries may be mailed or delivered to:

**2023 Water Conservation Art Contests
City of Dallas OEQS Water Conservation Division
1500 Marilla Street, Room 2AN
Dallas, TX 75201
Attn: Education Coordinator**

Artwork must recognize the importance of saving water. (Ideas on page 3) Artwork will be judged on creativity, relevance, legibility, and adherence to guidelines:

- Creativity: Artwork should reflect the student’s appreciation of the importance of water and illustrate a water conservation method or concept.
- Relevance: The idea for the artwork relates to our **2023 theme** and must include the statement **“The Power of Every Drop.”**
- Legibility: The artwork is readable and easily understood.
- Adherence to Guidelines: The entry must be submitted on white or off-white background paper and is at least 8 ½” x 11” with a maximum size of 36” x 36”. (Notebook or graph paper may not be used.) The student may use water or tempera paint, crayon, ink, charcoal, pastel, etc. Reflective materials such as glitter or gold stars or items such as cotton balls, straw, magazine pictures or fabric glued to the art are prohibited and will result in disqualification.

Each entry must be the work of one (1) student. The concept, design and artwork must be the original work of the student entering. If the judges determine that someone other than the student has assisted in the creation of the poster, the entry will be disqualified. Winners are selected at the discretion of the judging panel.

Water Conservation Tips

Theme: “The Power of Every Drop”

Water is our most precious resource. Think about this. The oceans would not exist if there had not been the first drop of water. Drops of water steadily dripping onto stone can hollow it out, a droplet of water sliding over a surface can create an electric charge. People need to drink water every day to be healthy! Without water, we could not wash clothes or our hair, we could not grow food. Water has all this power in every drop. Let us not wait for a water crisis in our area to save it!

1. Water covers 71% of our planet but there is only 1% available fresh water for drinking and use at home, at school, for work, and at play!
2. The drop of water falling on your head as rain, may have been the same drop of water a dinosaur drank. It is all the same water in the water cycle!
3. Take shorter showers – five minutes or less. Try to save even more by turning the water on to get wet then turn it off to lather up, and finally turning it back on to rinse off.
4. Think about other ways to use water before letting it go down the drain. Water plants with pasta water or the water used to boil eggs or potatoes! Find healthy ways to reuse water.
5. Avoid water toys that need a constant stream of water.
6. Only run the dishwasher or washing machine when they are full.
7. Watch for leaky faucets and learn how to help your mom or dad fix them. Did you know that it can waste over 25 gallons of water a day?
8. Ask your parents to install a water-saving shower head. In addition to the water it saves, it also saves the fuel that would have been used to heat up the extra hot water. That saves your family money and helps reduce pollution.
9. Do not let the water run when you wash dishes.
10. Do not let the water run when you brush your teeth. Wet your toothbrush, brush your teeth, turn the water on to rinse your mouth out and the brush, then turn it off!
11. In Dallas, water twice weekly or less. Become best friends with your sprinkler system and the controller, learn how it operates! Another landscape tip: too much water causes grass and plants to have shallow roots which can make them unhealthy.
12. Try to do one thing each day that will save water. Even if savings are small, every drop counts.

Water Conservation Art Contest Entry Form

***A completed entry form must be included with each submission, or it will be disqualified.
(Form must be taped or glued to the back of artwork)***

All entries become City of Dallas property and may be reproduced in future water education literature.

Please type or print legibly.
